

Windows 10 Start Menu Tiles

1. This is the new Start menu. The programs and settings are on the left. The app tiles which usually open Windows Store apps is on the right.

2. Change the size of a tile by right clicking a tile and choose resize - small, medium, wide or large.
3. Some of the tiles may give you live updates. If you find that too distracting, right click on a tile and choose More then Turn live tile off.
4. To remove a tile, right click on it and choose Unpin from Start.
5. Add an app by going to the Store tile. It might require you to create a Microsoft account. This account isn't tied to the Sioux City School District. If you forget your password you'll need to contact Microsoft.
